Dear Resident:

We are pleased to provide the information in the Milling & Paving Notice below as part of our continued commitment to infrastructure repair, replacement, and improvement. Specifically, this project is part of this year's roadway improvement plan.

We apologize for the inconvenience, but we are pleased to complete yet another Township project. Thank you.

Mayor & Council
Township of Montclair

MILLING & PAVING NOTICE

RESIDENTS OF CROSS STREET
(HARRISON AVENUE TO ORANGE ROAD)

Milling of this roadway is scheduled to begin on or about **Wednesday, October 21, 2026**, weather permitting. Paving is expected to follow beginning on or about **Thursday, October 22, 2026**, weather permitting. Milling and paving operations will begin at approximately 7:00 a.m. and the portions of the street listed above will be closed during these construction periods. However, limited access will be provided to local residents, as appropriate and necessary.

All vehicles must be off the street and out of driveways by 7:00 a.m. and will remain off until 6:00 p.m. unless otherwise directed by on-site Township personnel. Overnight on-street parking will be allowed on the adjacent cross streets during this road construction period. Make all necessary arrangements to park your vehicle accordingly. Once milling and paving operations are completed, roadway restriping will take place. Please be sure to obey all traffic signage and roadway markings to ensure the safety of all road users.

MILLING – The roadway will be open to traffic once milling operations and all cleanup have been completed. Please expect delays in your daily commute due to the contractor's activity if driving through the work area. Once milling has been completed, please use caution while driving or walking in these areas as the manholes and catch basins will be raised. Paving will be completed within two to three days.

PAVING – The roadway will remain closed to traffic for an additional 4 to 6 hours after paving is completed to allow the asphalt to cool. No vehicles will be permitted on the roadway until the barricades are removed.

Police officers and/or Township personnel will be directing traffic during the milling and paving operations.

If there is a problem and the Township inspector is not on-site, we ask that you do not approach the contractor but immediately call the Department of Public Works at 973-509-5711. The inspector will contact you by phone within a short time.
Questions regarding PSE&G activities within the project area should be directed to (800) 436-7734.

Mayor Dr. Renée Baskerville and Township Council
Deputy Mayor and Councilor-at-Large Susan Shin Andersen • Councilor-at-Large William Harrison
1st Ward Councilor Erik D'Amato • 2nd Ward Councilor Dr. Eileen Birmingham • 3rd Ward Councilor Rahum Williams • 4th Ward Councilor Aminah Toler

Please be advised that the time gap between when a road is milled and when it is paved can vary due to a number of factors:

1. Inclement weather or colder temperatures preclude paving work.

2. Post-milling inspections. Milling creates severe vibrations. The paving operation is delayed for some days to ensure that no water or gas line breaks will occur. In fact, the Township has PSE&G inspect gas lines within milled roads with "sniffer" trucks before paving.

3. PSE&G construction. PSE&G will often use a milled road as an opportunity to install new infrastructure such as underground cable for streetlights or gas mains. This work delays paving but the result is a more resilient grid.

Every effort will be made to minimize inconvenience. However, this project will cause a temporary disruption of normal routines and schedules. Please plan accordingly.

MILLING & PAVING NOTICE

RESIDENTS OF HARRISON AVENUE
(VIRGINIA AVENUE TO CEDAR AVENUE)

Milling of this roadway is scheduled to begin on or about **Monday, October 26, 2026**, weather permitting. Paving is expected to follow beginning on or about **Tuesday, October 27, 2026**, weather permitting. Milling and paving operations will begin at approximately 7:00 a.m. and the portions of the street listed above will be closed during these construction periods. However, limited access will be provided to local residents, as appropriate and necessary.

All vehicles must be off the street and out of driveways by 7:00 a.m. and will remain off until 6:00 p.m. unless otherwise directed by on-site Township personnel. Overnight on-street parking will be allowed on the adjacent cross streets during this road construction period. Make all necessary arrangements to park your vehicle accordingly.

Once milling and paving operations are completed, roadway restriping will take place and will introduce new traffic calming measures which will alter traffic patterns. Please be sure to obey all traffic signage and roadway markings to ensure the safety of all road users. During this period, the street may be closed at various times throughout the duration of this project.

MILLING – The roadway will be open to traffic once milling operations and all cleanup have been completed. Please expect delays in your daily commute due to the contractor's activity if driving through the work area. Once milling has been completed, please use caution while driving or walking in these areas as the manholes and catch basins will be raised. Paving will be completed within two to four days.

PAVING – The roadway will remain closed to traffic for an additional 4 to 6 hours after paving is completed to allow the asphalt to cool. No vehicles will be permitted on the roadway until the barricades are removed.

Police officers and/or Township personnel will be directing traffic during the milling and paving operations.

If there is a problem and the Township inspector is not on-site, we ask that you do not approach the contractor but immediately call the Department of Public Works at 973-509-5711. The inspector will contact you by phone within a short time.
